Summary

Results-driven Software Engineer with 5+ years of experience in developing secure and scalable fintech and healthcare applications. Specialized in Flutter, React, and REST API integration with strong expertise in state management solutions including Provider, GetX, Riverpod, and Redux. Passionate about building high-performance mobile applications with clean architecture and optimized user experience.

Key Achievements

Enhanced Application Performance
Increased application performance by 30% with optimized architecture and efficient state management.

Strengthened System Reliability
Implemented robust scalable architecture, improving system reliability By 40% across fintech applications.

Accelerated Development Process
Led a team of 4, resulting in a 50% reduction in development time for Mobile applications.

Improved API Integration
Successfully integrated 15 RESTful APIs, Enhancing application functionality and data synchronization.

Experience

Codebase Technologies

Software Engineer — 08/2020

Fintech Company

- Developed and maintained multiple mobile banking and fintech applications using Flutter & Dart.
- Built scalable and secure cross-platform applications for financial clients.
- Implemented state management using Provider, GetX, and Riverpod to improve stability and performance.
- Integrated secure REST APIs for transaction processing and real-time data synchronization.
- Applied clean architecture principles to reduce bugs and improve maintainability.
- optimized application performance and ensured responsive UI across devices.

Education

Karachi University — 01/2025

Master in Computer Science

Shah Abdullah Latif University

Bachelor of Science in Computer Science

Certifications

- Hacker Rank – JavaScript | Credential ID https://www.hackerrank.com/certificates/iframe/44b31ad6de94

Skills

GitHub React Flutter Node.js · REST· JavaScript Dart Next.js Redux ANTD React Native MongoDB Express.js Git Docker Axios Material UI

Projects

Tabeeby App

- Full-stack online doctor appointment system (Web & Mobile).
- Web: React.js + Ant Design
- Mobile: React Native + Redux

Gold Drive App

- Developed frontend using React.js & Redux.
- Integrated APIs for real-time ride updates.

Dakter's App

- Developed responsive telemedicine system using React.js & Redux.
- Enhanced UI consistency using Ant Design.
- Integrated backend APIs for bookings and live updates

Key Banking Projects

Wink Banking App

- Developed secure mobile banking features using Flutter.
- Implemented structured state management to enhance app stability.
- Improved UI consistency using Material Design standards.

AAA Finance – InterSwitch Banking Apps

- Built scalable fintech applications with smooth API integration.
- Focused on performance optimization and reliability.

Raqami, Ignite & Audi Banking Apps

- Developed and maintained cross-platform banking applications.
- Ensured responsive design and robust architecture.
- Implemented best practices to reduce crashes and improve system reliability.
